

Q1 Movie rental count by film category for each quartile

Four pie-charts are used for visualisation each representing one of the quartile.

Each of the pie-chart provide us with the rental count of the movies by category

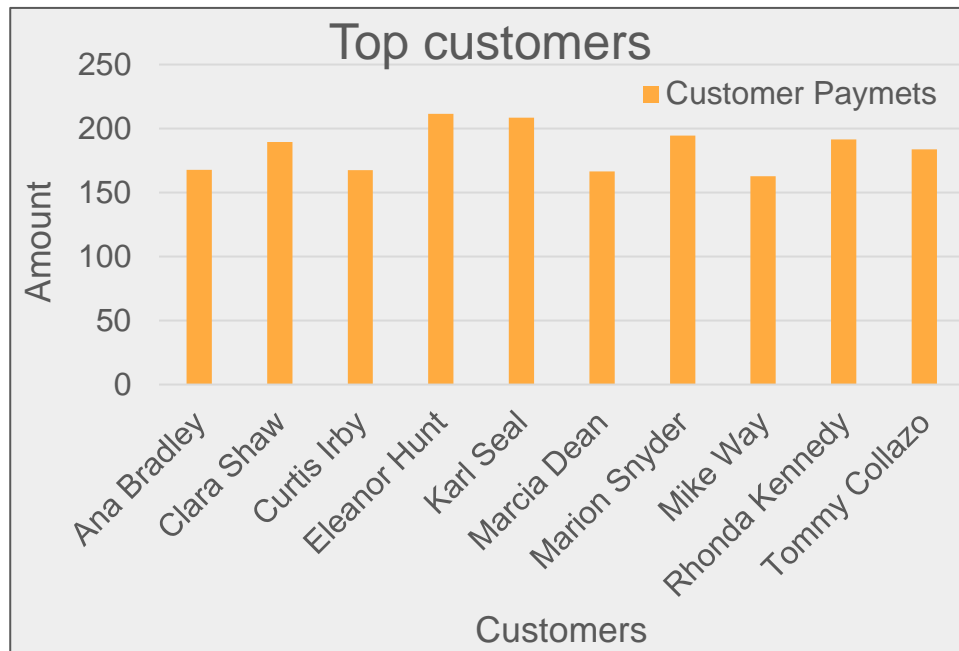

Q2 Count of rental orders fulfilled by stores 1 & 2 during that month

The bar-chart visualises the rental count fulfilled by the store during each month .

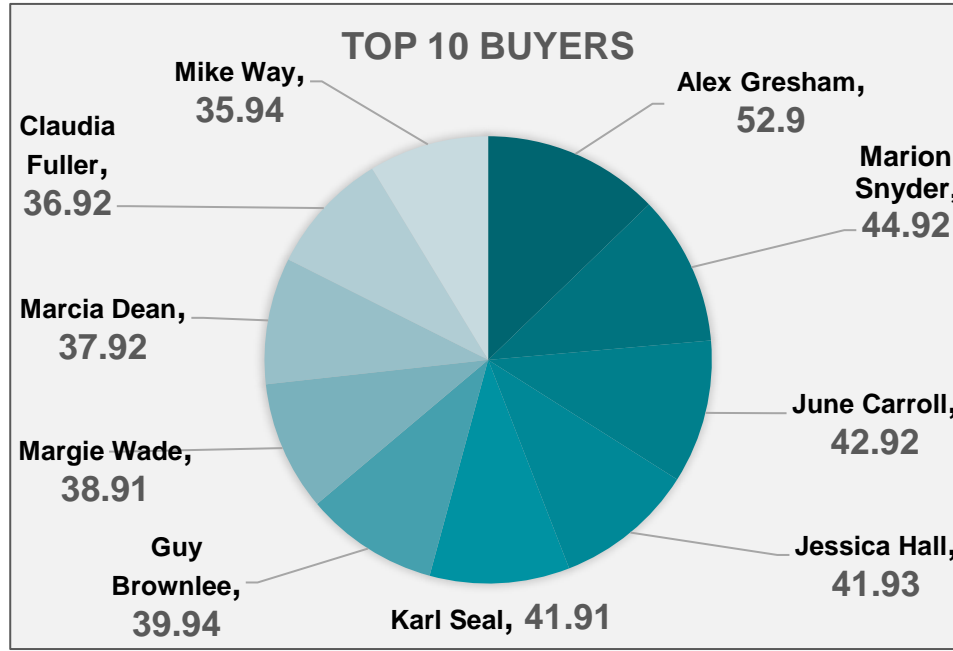

From the bar-chart we can infer that both the stores had maximum rental count during the month July(7) of 2006

Q3 Top 10 customers during 2007 and total amount payed during that year

The bar-chart gives the sum of all payments made by each customers during 2007

Q4 Top 10 paying buyers of the first accounted month

The pie-chart the top 10 payed customers of the first accounted year and their billed amount along the clock-wise direction of the pie chart.

The first accounted month was found and then the top 10 buyers in that month were found.
